

Teen Film-Making Workshop

The art and the craft of filmmaking is a process through which we can translate and interpret the human experience, creating visual and audio expression and perspective. This week-long workshop with professional filmmaker Ken Peterson gives students the opportunity to explore the various aspects of filmmaking through classroom discussion and demonstrations, with a major emphasis on hands-on practical exercises to help develop the technical foundation useful in future film work. The workshop will cover The Script, Scene Direction, Techniques for Camera, Sound and Lighting, and How to Use the Resources at Hand. By nature, filmmaking is an inclusive, collaborative process. Students will work together to create a short film, hold a screening and post to our web site.
